- C: 32"
- D: 46"

- Loading aperture**
Width: 29"
Depth: 20"
- Cycle time** 40 secs.
- RAM force** 3,300 lbs. (17 p.s.i.)
- Trash Bin size** 65/96 gal.
- Weight single chamber unit**
Total: 190 lbs.
- Noise level** < 55 db (A)
- Protection class** IP 55
- Operating power**
Single Phase 115 V, 60 Hz, 10 A

Orwak LE - flexible modular system

Based on an ingenious modular system and made from maintenance-free aluminum. The entire system consists of movable modular components.

You can organize a complete miniature recycling station, within a couple of square yards of floor space, where waste can be processed and conveniently sorted for immediate recycling or disposal. Flexible design allows capacity to be tailored to requirements. Little Elephant compacts into standard bins, bags and bales.

The presshead slides easily over the chambers.

Basic single chamber unit.

One compactor head rolls on a track above four stations.
